 married
 3 children

PROFESSOR IN ASTROPHYSICS AND SPACE SCIENCE

Positions

2000-present **Professor** at Paris Observatory
1993-2000 **Assistant professor**, Université Pierre et Marie Curie (Paris 6)
1990-1993 **Professeur agrégé préparateur** (teaching duty equivalent to an assistant professor)
 École Normale Supérieure de Paris
1988-1990 Fellowship: **Ancien normalien doctorant**

Education

2000 **Habilitation à diriger des recherches : Jovian seismology** (Université Pierre et Marie Curie)
1988-1992 **PhD in astrophysics: Etude théorique et observationnelle des oscillations de Jupiter** (supervisor D. Gautier, Université Paris-Sud)
1988 **Université Paris-Sud**: master degree in astrophysics
1984-1988 **Ecole Normale Supérieure de Cachan**, agrégation de sciences physiques

Teaching responsibilities

Physics, Astrophysics: beginners to graduate students
Planetary and stellar interior structure and evolution: graduate students
Space science: graduate students

2012-present **Head of the Student Space Campus C²ERES** (Campus et Centre de Recherche pour l'Exploration Spatiale), campus spatial de PSL).
 📧 <https://cceres.univ-psl.fr/>
The development of nanosatellite projects allows students to share the skills of engineers and develop serious professional skills. This project is supported by Airbus Space Industry, supported and funded by the Laboratoire d'Excellence ESEP, by the Observatory of Paris and by PSL. 310 k€ funding for the Concurrent Design Facility and the Test Facilities.

2012-present **Head of the SPACE Master at USTH** (Université des Sciences et Technologies d'Hanoi).
USTH is a French-Vietnamese University. The Observatory of Paris is involved in the creation of the Master Space & Application, aiming at developing space science in Vietnam. This operation follows the successful launch of the satellite VNREDSat-1, built by EADS/Astrium, and is conducted with the French space agency.

2006-present **President of the steering committee** of the project 'Astro à l'Ecole' (l'Univers à portée de main)
Science à l'École promotes the development of practical sciences in secondary and high schools. In astronomy, this corresponds to the distribution of reflectors and refractors to be used by the pupils, with the corresponding training of tutoring. As president of the committee 'Astro à l'École', I have to manage the selection of the projects.

2001-2011 **PI of the e-learning project 'Fenêtres sur l'Univers'**
 📧 <http://media4.obspm.fr/public/FSU/>

2000-present **Head of the Master degree 'Astronomical and Space-based Systems Engineering'**
I have created this degree supported by the space laboratories in Île-de-France, by space and high-technology agencies, and by leading industrialists. The degree trains physicists to space engineering. 85% of the graduates work as engineers in high-technology industry, after a PhD in instrumental engineering for 22 % of them.
 📧 <http://osae.obspm.fr/>

Teaching administration

2017-	Head of the project of graduate school EUREQA (école universitaire de recherche : espace, qualité, astrophysique)
2012-2016	Advisor of the education board of PSL
2012	President of the hiring committee for an assistant-professor position in stellar physics at Université Paul Sabatier, Toulouse
2007-2008	Commission de spécialistes (hiring committee), section 37 (geophysics), Institut de Physique du Globe de Paris. Nominated member
2006-2011	Head of the hiring committee for ATER (1-year position, with teaching and research) and 'moniteurs' (3-year teaching service, in parallel to a PhD), at Observatory of Paris
2005-2008	President of the hiring committee , section 34 (astronomy-astrophysics), Observatoire de Paris. <i>This council is responsible for hiring assistant-professors and lecturers</i>
2002-2004	Member of the working group for implementing the LMD system at Observatoire de Paris (M and D level)
2002-2004	Hiring committee, section 34 (astronomy-astrophysics), Observatoire de Paris. Elected member
2001-2008	Hiring committee, section 34 (astronomy-astrophysics), Université Pierre et Marie Curie. Nominated in 2001, 2004 and 2007.
2001-2014	Education board, Observatoire de Paris. Nominated member
2000-2004	Education board of Ecole Doctorale d'Astronomie et Astrophysique d'Île-de-France. Nominated member
1999-2000	Hiring committee, section 34, Observatoire de Paris. Nominated member
1997-2006	Examiner of the competitive exam, École Polytechnique (2e épreuve de physique, concours MP)
1995-2000	Commission de spécialistes, section 34, Université de Versailles-St-Quentin-en-Yvelines. Nominated member
1995-2000	Hiring committee, section 34, Université Pierre et Marie Curie (Paris 6). Elected member
1990-2000	Examiner of the preparation cursus for the "agrégation de sciences-physiques"

Research

Asteroseismology - Derivation of global seismic parameters; seismic indices
- Stellar evolution; Galactic archeology; red giant interior structure; core rotation

Instrumentation - Fourier transform spectrometry and tachometry; radial velocity measurements
- Space observations; ultra-precise photometry
- Ground-based asteroseismic observations in Antarctica

PhD management I supervised the PhD theses of Patrick Gaulme (2002-2005) in Jovian seismology, Supakrit Maharakkhaka (2005- abandonment in 2007 for family reasons) in instrumentation, Mathieu Vrad (2012-2015) and Charlotte Gehan (2015-2018) in asteroseismology. Patrick is a Research Astronomer in the Department of Astronomy at MPI Göttingen, Supakrit is a full-time lecturer at the Assumption University of Thailand, Mathieu is a post-doc at the University of Porto, and Charlotte is ATER at the Observatoire de Paris.

Currently, I supervise two theses in space engineering on attitude control and propulsion (Gary Quinsac, Boris Segret).

Research administration

2016-2021	Elected president of the CoNRS section Solar system and Universe (Section 17 du Comité National de la Recherche Scientifique). <i>This council is responsible for hiring, promoting and assessing French researchers in astronomy and astrophysics. As president, I represent this council at the Institut des Sciences de l'Univers (INSU, CNRS), being in charge of putting the priorities into practice. This task is equivalent to a 30 % FTE.</i>
2014, 2009	Participation to the last four 'colloques de prospective' of INSU / CNRS
2003,1998	<i>These colloquia are equivalent to decadal surveys; in 1998 I received an invitation as young researcher; the following participations were motivated by various responsibilities</i>
2011-2015	Elected president of the French national council of Astronomy (CNAP: Conseil National des Astronomes et Physiciens). <i>This council is responsible for hiring, promoting and assessing French Astronomers, in charge of 236 researchers in 14 observatories. As president, I represent this council at the Institut des Sciences de l'Univers (INSU, CNRS), being in charge of putting the priorities into practice. I interact with the French Ministry and with the observatories.</i>

	<i>This task is equivalent to a 25 % FTE.</i>
2006-2009	Member of the consortium ARENA (Antarctic Research, a European Network for Astrophysics), activity: 'Toward Large Astronomical Instruments in Antarctica'
2001-2006	Appointed member of the GTSS (working advisory group for planetary science), CNES (French space agency)
1995-1999	Member of the scientific committee "Saturn" of the Programme National de Planétologie (CNRS/INSU)
1998-2000	Expert for astrophysics and space science at the Direction for Research (Ministère de la Recherche). <i>I had to supervise all actions and operations related to Astronomy, Astrophysics and Space (Astronomy & Astrophysics at INSU, large facilities (CFHT, Themis, ESO...), astronomy and planetology space mission conducted by the French space agency). This task represented a 50% FTE.</i>
1997-2000	Member of the French TAC (comité français des grands télescopes, CNRS/INSU)

Project management

2013-2017	Co-PI of IDEE ANR Project: Interaction des Étoiles et des Exoplanètes = Stellar Driving on Exoplanets (IAS: F. Baudin; LESIA: B. Mosser; Sap/CEA: R. Garcia); Funding = 372 k€ <i>This project aims at precisely characterizing the stars in order to determine their influence on their possible planetary system. As the determination of the size and mass of an exo-planet depends on that of the star, one of our goals is to obtain precise stellar mass and radius measurements</i>
2010-present	Co-I of the ESA mission Plato <i>PLATO is the third medium-class mission in ESA's Cosmic Vision program. Its objective is to find and study a large number of extrasolar planetary systems.</i> <i>I am in charge of two work packages on stellar activity and one work package on stellar evolution.</i>
2007-2012	Co-I of the CNES mission CoRoT <i>Analysis of the stellar activity and granulation. Analysis of the red giant data; population study</i>
2003-2009	PI of the SIAMOIS project (Seismic Interferometer Aiming to Measure Oscillations in the Interior of Stars). <i>SIAMOIS is a project devoted to ground-based asteroseismology, using an instrument to be installed at the Dome C Concordia station in Antarctica. The project was developed up to phase A/B.</i>
2000-2004	PI of the project 'un sismomètre performant pour l'astérosismologie' <i>Funding = 170 k€, Action concertée incitative of MENRT.</i>
1997-2002	PI of the JOVIS project (Jupiter: observation of variability, imaging and seismometry). <i>JOVIS was proposed to the French space agency as a micro-satellite dedicated to the observations of the Jovian variability.</i>

Publications

1990-present	177 articles in peer-reviewed journals, 38 as first author, which more than 11900 citations (as of October 2018; source SAO/NASA Astrophysics Data System) Typology of my work: publications dealing with giant-planet seismology have addressed major aspects of this topic; publications with CoRoT and <i>Kepler</i> data are much more visible, due to the increasing importance of asteroseismology. My publications as first author show that I play a leading role in red giant seismology. Five recent significant publications <ul style="list-style-type: none"> • Mosser, B.; Benomar, O.; Belkacem, K.; Goupil, M. J.; Lagarde, N.; Michel, E.; Lebreton, Y.; Stello, D.; Vrard, M.; Barban, C and 11 coauthors. Mixed modes in red giants: a window on stellar evolution. <i>Astronomy and Astrophysics</i>, 2014, vol. 572, L5. • Mosser B., Michel E., Belkacem K., Goupil M.J., Baglin A., Barban C., Provost J., Samadi R., Auvergne Michel, Catala C. Asymptotic and measured large frequency separations. <i>Astronomy and Astrophysics</i>, 2013, vol. 550, pp. 126. • Mosser B., Goupil M.-J., Belkacem K., Michel E., Stello D., Marques J. P., Elsworth Y., Barban C., Beck P. G., Bedding T. R., and 8 coauthors. Probing the core structure and evolution of red giants using gravity-dominated mixed modes observed with Kepler. <i>Astronomy and Astrophysics</i>, 2012, vol. 540, pp. 143. • Mosser B., Goupil M.J., Belkacem K., Marques J. P., Beck P. G., Bloemen S., de Ridder Joris, Barban C., Deheuvels S., Elsworth Y., and 11 coauthors. Spin down of the core rotation in red giants. <i>Astronomy and Astrophysics</i>, 2012, vol. 548, pp. 10. • Bedding T.R., Mosser B., Huber Daniel, Montalbán Josefina, Beck P., Christensen-Dalsgaard Jørgen, Elsworth Y.P., García Rafael A., Miglio Andrea, Stello D., and 24 coauthors. Gravity modes as a way to distinguish between hydrogen- and helium-burning red giant stars. <i>Nature</i>, 2011, vol. 471, pp. 608-611.
2007-present	Referee for the Polish National Science Centre, the Research Service and Career Development of the

Wien University, the Belgian Fund for Scientific Research, the English Science and Technology Facility Council
1993-present Referee for A&A, ApJ, ApJL, Icarus, MNRAS, Planetary and Space Science, Advances in Space Research

Observations with large international facilities

2009-present Member of the KASC consortium. Col of the Working Group 'stars in cluster'
Analysis of the red giant data; population study
2007-2013 Col of CoRoT; seismic analysis of HD 175726, 175272
Analysis of stellar activity and granulation
Analysis of the red giant data; population study
2004-06 11 + 5 nights with the high-resolution spectrometer HARPS at ESO 3.6-m telescope (HD 49933, HD 203608)
1994 12 half-nights for observing the impacts of the SL9 cometary fragments on Jupiter. ESO 3.6-m telescope + TIMMI infrared detector
1991-99 5 observing runs (total = 27 nights) with the Fourier Transform Spectrometer at the 3.6-m CFH Telescope (Hawaii); asteroseismic observation of Jupiter, Saturn, Procyon

Outreach

1990-present 8 articles in scientific journals with a broad audience (The Messenger, La Recherche, L'Astronomie, JAF...)
24 public lectures

Memberships

1989-present Société Française d'Astronomie et d'Astrophysique
1988-2007 Division for Planetary Sciences, American Astronomical Society

Awards

Nov, 2016 Chevalier dans l'ordre national du mérite
July 14, 2013 Chevalier dans l'ordre des Palmes Académiques
2000-present Annual bonus awarding research and teaching quality (PEDR, PES).

Personal involvement

2005-2016 President of the local association FCPE (Fédérations des Conseils de Parents d'Élèves), collège Alain-Fournier, lycée Blaise-Pascal, Orsay
1998-2016 Involved in the schools of my children (primary school, secondary school, high school). Elected member of the Conseil d'École, then of the Conseil d'Administration (board of directors)
